

# PROFAL1-76

Profili / Profiles

## Caratteristiche dell'anima metallica / metal core characteristics

|                                                    | Um | Norme / norms | Valore / value |
|----------------------------------------------------|----|---------------|----------------|
| Profilo in alluminio / aluminum profile            |    | EN AW-6060    |                |
| Composizione chimica / chemical composition        |    | UNI EN 755-2  |                |
| Caratteristiche meccaniche / mechanical properties |    | UNI EN 573-3  |                |
| Diametro profilo / diameter profile                | mm |               | 76             |

Tabella Tolleranze / Table Tolerances

|                               | da / from | a / to | Um   | tolleranze / tolerances |
|-------------------------------|-----------|--------|------|-------------------------|
| Durezza / hardness            | -         | -      | SH/A | ± 5                     |
| Spessore / thickness          | -         | -      | mm   | ± 0,02                  |
| Resa elastica / elastic yield | -         | -      | %    | ± 3                     |
| Dimensioni / dimensions       | -         | -      |      | ISO 3302-1-M3           |
